DETAILED ACTION

Response to Amendment

1. The present Office action is made in response to the Pre-amendment filed on 4/29/05. It is noted that in the Pre-amendment, applicant has made changes to the specification and the claims. Regarding to the claims, applicant has canceled claims 1-27 and added a new set of claims, i.e., claims 28-58, into the application.
2. As newly-added, the pending claims 28-58 are subjected to the following restriction.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 29-30 and 45-50, drawn to an illumination system for a stereomicroscope.

Group II, claims 31-44 and 51-58, drawn to an arrangement of optical elements, switching system, carrier and beam splitter inside a stereomicroscope.

Note:

Claim 28 is a linking claim which claim will be examined with the claims of the elected group. Also note that claim 38 was drafted as a dependent claim of claim 1 which claim was canceled in the pre-amendment of 4/29/05. The claim

38 recites similar features as those recited in claim 37, thus claim 38 is grouped into group I. Applicant should either cancel claim 38 or amend claim 38 to other claim except the canceled claim(s).

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The arrangement of optical elements and their mechanical supporters/holders as recited in Group II does not have the same technical features to the illumination system as recited in Group I.

5. A telephone call was made to Michael L. Dunn on 12/7/2007 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of

record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
